

## castlerally

Welcome to Malberg castle.  
I am Heinrich,  
the castle ghost.

I have lived in Malberg Castle for many hundreds of years. It is said that a treasure is hidden here. Would you like to help me find it?

To do so, you have to solve some riddles.  
Let's go...

1

### Look at the castle gate.

There you see a grimace or as they say here in Malberg dialect: „Greilich Gesiecht“ (ugly face). It keeps the evil spirits away from the castle. Above the grimace you can see the coat of arms of the von Veyder family, who owned the castle many years ago.

Johann Werner von Veyder was a clever man. He studied law and theology and was later auxiliary bishop of Cologne.

Fill in the marked letters in the fields and you will know where to go next.

I \_\_\_\_\_ D \_\_\_\_\_ N \_\_\_\_\_

2

Your way leads past the old brewery. Beer was brewed in the Eifel for centuries, including at Malberg Castle, which later served as a residential building.

### Go through the garden gate.

Besides the beautiful flowers, herbs also grow in the garden. Even in the past, medicinal plants and even vegetables were grown here. Do you see the sea creatures? Count them.

Answer

3

Now look for the  
lindworm in the Iron  
Garden.

Answer

---

---

TIP:

Look for a slate stone there  
on the lookout.

4

Are you in the right place?

Do you see the white figures on  
the left?

They are guarding the castle.

How many figures are there?

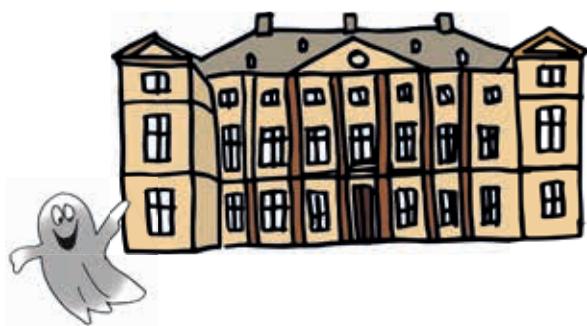

Answer

You are standing between the so-called  
„Old House“, the magnificent „New  
House“ and the „Arcade Building“, whe-  
re the carriages of the lords of the castle  
used to stand.

This is where I live, isn't it great?

A very famous architect has planned the  
„New House“, it was the  
Venetian Count Matteo Alberti.

5

Now go past the arcade building  
in the direction of the  
Round Garden  
(Through the gate with the grimace).

It is said that the sword of the knight  
Kuno was hidden on this path.

According to legend, he put it there  
when he went to Himmerod Abbey to  
become a monk.

Answer

Find the sword and count the  
diamonds.

6

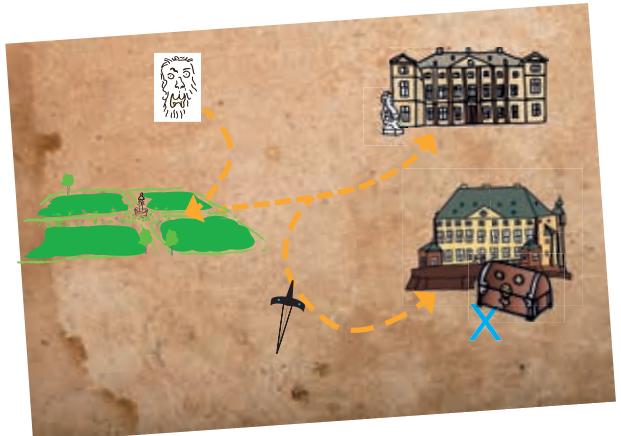

### And now on to the round garden.

Here I often play and enjoy the beautiful view into the Kyll valley. By the stairs you can see white figures. These are replicas of the precious figures made by the sculptor Ferdinand Tietz.

It is said that the figures talk to each other at night, tell each other jokes and laugh loudly.

According to my treasure map, we should now be in the right place.

**Look around, this must be where the treasure is.**

**Did you find the treasure chest?**

**Now, to open the lock, set the numbers you collected in the tasks according to the sequence.**

**You did a great job!**

All tasks were solved and the treasure was found.

**Throw the address slip into the slot and close the chest again. Thank you.  
You will receive mail soon.**

See you soon in the vacation region  
Bitburger Land, your Heinrich
